Notices.

3. If in any case the Health Officer or a Sanitary Inspector considers that the issue of a notice under these regulations is likely to lead to such an amount of delay as might facilitate the spread of cholera he may forthwith take such steps as he may think fit for carrying out the work, and shall thereafter, as soon as possible, issue a notice on the person concerned stating the reason why such work has been carried out.

4. If any measure which the Health Officer or a Sanitary Inspector has, by a notice issued under these regulations, required to be carried out, be not carried out to his satisfaction within the time stated in the notice the Health Officer or a Sanitary Inspector shall be entitled to carry out the measure.

(*2*) The municipality may recover all expenses incurred by the Health Officer or a Sanitary Inspector in carrying out the measure under regulation 4 from the person or persons to whom the notice was originally issued.

Third Forecast of the Cotton Crops of Bengal, 1943-44.

(*Note.*—On an average of the 5 years ending 1941-42, the area under cotton in the territories to which this forecast relates has represented in the province of Bengal some 0·3 per cent. and that in the Tripura State some 0·1 per cent. of the total area sown under cotton in India.)

There are two crops, early and late. The early crop is chiefly grown in the Chittagong Hill Tracts, Tripura State and Mymensingh as also to small extent in other districts. The late variety is grown mainly in Bankura and Midnapore.

Character of the season.—The weather has, on the whole, been favourable, and the present condition of the crop is fair except in Chittagong Hill Tracts where it is reported to be poor due to lack of proper care on the part of the cultivators.

Area sown.—The total area sown with the early cotton this year is returned at 83,768 acres as against 106,286 acres both in the corresponding and final forecasts of last year and that with the late variety to be 145 acres against 395 acres both in the corresponding and final forecasts of last year.

Outturn.—The outturn of the early crop this year is estimated to be 21,580 bales against 31,852 bales both in the corresponding and the final forecasts of last year and that of the late variety to be 58 bales this year against 70 bales both in the corresponding and final forecasts of last year.

DEPARTMENT OF AGRICULTURE, BENGAL.

Calcutta, the 31st December 1943.

Third Forecast of the Cotton Crops of Bengal, 1943-44.

(*Note.*—On an average of the 5 years ending 1941-42, the area under cotton in the territories to which this forecast relates has represented in the province of Bengal some 0·3 per cent. and that in the Tripura State some 0·1 per cent. of the total area sown under cotton in India.)

There are two crops, early and late. The early crop is chiefly grown in the Chittagong Hill Tracts, Tripura State and Mymensingh as also to small extent in other districts. The late variety is grown mainly in Bankura and Midnapore.

Character of the season.—The weather has, on the whole, been favourable, and the present condition of the crop is fair except in Chittagong Hill Tracts where it is reported to be poor due to lack of proper care on the part of the cultivators.

Area sown.—The total area sown with the early cotton this year is returned at 83,768 acres as against 106,286 acres both in the corresponding and final forecasts of last year, and that with the late variety to be 145 acres against 395 acres both in the corresponding and final forecasts of last year.

Outturn.—The outturn of the early crop this year is estimated to be 21,580 bales against 31,852 bales both in the corresponding and the final forecasts of last year and that of the late variety to be 58 bales this year against 70 bales both in the corresponding and final forecasts of last year.

M. CARBERY, Director.
